

Has this file been identified as malicious? Explain why or why not.

Yes, the file has been identified as **malicious**. When the employee opened the password-protected spreadsheet file, it executed a malicious payload on the system. According to the VirusTotal report, **57 out of 71 security vendors flagged the file as malicious**, which strongly indicates that the file is unsafe. Additionally, sandbox analysis showed that the file created unauthorized executable files and exhibited behaviors consistent with malware. These findings confirm that the file is malicious.
