

# Security incident report

## Section 1: Identify the network protocol involved in the incident

The protocols involved are **DNS, HTTP, and TCP/IP**.

## Section 2: Document the incident

The webpage was compromised because a hacker performed a brute force attack on the administrative account. The attacker repeatedly attempted default passwords until the correct one was guessed. After gaining access, the hacker changed the website's source code, causing the website to redirect users to another website that contained malware.

## Section 3: Recommend one remediation for brute force attacks

Introducing the CAPTCHA verification.
